Straight Line 209 PrimerDispenser

This is our own design of a 209 primer dispenser. Built to last, it is made of solid Brass. Holds 12-209 Primers and comes with a handy built-in decapper. Sturdy spring steel carrying lanyard ring. Best of all, it works on most rifles requiring the 209 primer ignition system. Patented. *Measures 4-1/2" x 7/16" including lanyard ring.*

Straightline 209	SL209	13.25
------------------	-------	-------

Universal Straight Line Capper

Solid metal body constructed of brass. Unlike other brands, this body is NOT made from tubing. The precision channel is fabricated with just enough space for smooth movement of caps. Holds 20 caps. Will feed caps automatically when held in a vertical position while capping the nipple. Works well with revolvers, rifle, shotguns and inline action. *Measures 4-1/2" x 1/4" x 1/4"*

Universal Straightline Capper	SLC-2	13.50
-------------------------------	-------	-------

Terms listed on Page 13

Straight Line Musket Capper

TDC introduced an industry first – a new straight line musket capper for winged caps. This patented capper is built to hold both 4 and 6 wing caps. Holds 12 caps. Made from Brass. Works with any rifle needing musket caps. Designed with a convenient side loading slot with tension spring release. *Measures 5-1/4" long x 9/16" x 7-1/16" high*

Musket Capper	SLMC-2	19.50

Code: LSR

Leather Sheaths for Universal Capper and Rifle Capper for \$10.25 Quality made with thick soft leather

Ratcheting Nipple Wrench

Easy to use ratcheting nipple wrench! Heavy duty **American made** ratchet with custom made ratchet head made with hardened steel that fits #11 nipples on rifles or shot guns and musket nipples or pistol nipples. Tapered fit, standard 1/4" hex, interchangeable heads.

Description	Cost	Description	Cost
RNW-11	19.00	RNW-11-H (head only)	9.60
RNW-M	19.00	RNW-M-H (head only)	9.60
RNW-P	19.00	RNW-P-H (head only)	9.60

T-Handle Wrenches

The same material as our attachment heads for our Ratcheting Nipple Wrench but made into a T-Handle.

T-Handle Revolver	THR	8.55
T-Handle Rifle/Shotgun	THRS	8.55
T-Handle Walker Dragoon	THW	8.55

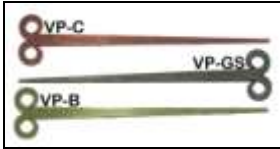

Rifle Nipples sold on Page 10

Percussion Cylinder Fixture

This is a very handy little fixture! Many revolver owners need to remove nipples from their cylinders and they don't want to mare the finish putting it in a clamp. Up until now they used a piece of leather. This is very strong and can be hand held or put in a vise as shown. It works on all sizes of cylinders!!

PCF \$5.25

Vent Pick

Antique Style Touch Hole Picks. The choices are Brass, Copper, and Nickel Silver. These soft metal picks will clean the touch hole without doing damage to it. Codes are in the picture.

Retail price is \$5.00

Plain Funnel

Our plain funnel is formed of solid brass with a rolled rim at the top for added strength. The funnel is 1-1/2" in diameter and approximately 13/16" long; the hole at the bottom is 1/4" inner diameter. This funnel has many uses; we use it in four different descriptions in this catalog. You can use it to fill any small container of all types. It is also great to solder onto a brass tube for a drop tube. Other popular uses are listed with our other types of funnels.

Brass Funnel FL-B 7.65

Filling Funnel with Handle

Brass funnel, hardwood handle. Hundreds of uses: filling horns, flasks, shot pouches, salt and pepper shakers and loading guns, cartridges, etc. Measures 6" long x 1-1/2" wide and 7/8" high

Filling Funnel FW-H 17.55

Deluxe Powder Measure with Funnel

Our Deluxe Powder Measure with Funnel (code: FWM) is made of solid brass and contains two major parts. The Powder measure and Funnel Kit can be purchased separately below.

Deluxe Powder Measure FWM 19.95

Powder Measure

The powder measure (code: PM) is graduated in 5 and 10 grain increments with thumb screw to lock it securely in place. This measure has graduations up to 120 grains.

Powder Measure PM 14.50

Powder Measure for Revolver

After many requests, we added a special adjustable powder measure made for revolvers. It is graduated in 5-grain increments with thumbscrew versatility which allows any measurement up to 50 grains.

Powder Measure for Revolver PMR 13.60

Funnel Swivel Measure

We now manufacture this beautifully made swivel top Powder Measure. It works GREAT and is accurate. The swivel funnel is riveted and will not come undone like the nut and bolt ones tend to.

Funnel Swivel Measure FSM 19.00

Powder Measure for Revolver Swivel

We added a swivel top adjustable powder measure made for revolvers. It is graduated in 5-grain increments with thumbscrew versatility which allows any measurement up to 50 grains.

Powder Measure for Revolver Swivel PMRS 17.85

Funnel Kit

The funnel kit (code: FK-B) consists of our standard funnel with a bracket riveted on a 1/2" diameter clamp. The funnel kit is held in place with a brass screw and nut. This funnel kit will quickly attach to any powder measure with a 1/2" diameter barrel.

Funnel Kit (w/clamps & screws) FK-B 10.75

Flask Filling Funnel

Solid brass construction. Designed to thread into powder flasks, powder horn valves and some powder horns. Designed to thread in just enough without damaging sliding gate. Also great for making a drop tube. 1-1/2" dia x 2-3/16" long.

Flask Filling Funnel FFF 11.85

Fixed Powder Measures

Fixed powder measures for just the right amount! Each one has the grain amount stamped right on it for easy reading. Made of quality brass tubing with a perfect top for hanging around your neck for easy use in the field.

Trade Gun Thimble

A Barnett trade gun copy. The rings varied in style and shape among makers even the same maker somewhat varied the pattern. These are 3/8" inside and the tabs have been welded and the ends cut at the correct angle.

Brass - 3/8	TGP-2B	2.35
Iron - 3/8	TGP-1B	2.35

Pistol Octagon

Same as our deluxe rifle sets but have no rings on the ends of the pipes. Consist of one lower or entry and one upper. Most pistols do not require a second upper pipe.

Patch Boxes

These patch boxes are made from .050 thick brass with nicely rolled hinges. With die cut boxes, a maker with a stock profiling machine can make one set-up, and all the same style boxes will fit the cut-out. Each box contains a high quality spring and screw lid operation; the pawl is already installed. Box is curved to fit the stock contour.

For the builder who may want a special patch box or would like to cut and shape to his liking, the two or four piece blank would be nice. The hard part is already finished. Made from .050 thick brass and curved to help the builder even more. Pawl already installed, included quality tempered spring and screw.
